

# GUIDED ONLINE FOOT & TOE MRI MINI-FELLOWSHIP

*Report with Confidence*

## WHY DO THE COURSE?

- With our **Guided Online MRI FOOT & TOE** Mini Fellowship learn to become **More Confident** in assessing Foot & Toe MRIs, Making an **Accurate Diagnosis** and issuing reports **Respected by Clinicians**.
- Structured, guided learning for you to become more confident in assessing and reporting Foot & Toe MRI by focusing on how you would assess scans at work by learning **Where to Look, What to Look for and How to Best Report it**.

## SEE HOW & WHAT YOU WILL LEARN:

*Click Image below*

## WHO'S TEACHING

Dr Ravi Padmanabhan is the Director of Radiology Education Asia. Originally from Australia and now based in Singapore, he works in MSK and Spine MRI, CT and Ultrasound Imaging and Intervention. He teaches by simplifying complex topics into what's essential, with the focus on what matters... **Making daily reporting Easier, Accurate & Confident.**

[www.radedasia.com](http://www.radedasia.com)

- Importantly, the course is **Guided** and you are not left on your own. Ask questions, clear doubts like an actual fellowship. (Click on image below to see more on how and what you will learn.)
- Through this Foot & Toe MRI Mini Fellowship we aim to make you you **More Confident to Assess, Make a Diagnosis** and issue **Reports Respected by Clinicians**.

## WHAT YOUR COLLEAGUES SAY

“ Very good review of the anatomy, Clear demonstrations of pathological processes. Flexibility of doing it at your own pace. Amazing Learning! ”

 **Dr DANA**  
USA

“ Great teaching, Great images. & Nice video lectures. Dr Ravi is an excellent teacher, & this is a great resource for both radiology trainees and MSK enthusiasts. ”

 **Dr GAUTAM**  
AUSTRALIA

“ Excellent as always Dr Ravi, simple, easy to understand, practical points for daily reporting. Enjoyed it as I could do it at my own pace. Wonderful program! ”

 **Dr TESSA**  
UAE

“ The way Dr Ravi explains complex things in a very smooth simple and reinforcing way is amazing! It should be assigned the Best of the Best online mini fellowship ever 😊 ”

 **Dr JORGE**  
MEXICO

## CPD/CME

30 CPD Hours for web-based learning by the Royal Australian and New Zealand College of Radiologists (RANZCR). RANZCR CPD/CME are recognised by most international licensing agencies.

## WHAT YOU WILL LEARN TO ASSESS AND REPORT MORE CONFIDENTLY IN 30 DAYS

In all topics we cover the normal appearance, anatomy, relevant macroscopic pathology and learn *Where to look, What to look for and How to report* with the aim of *Making your daily reporting Easier, Accurate and More Confident.*

### 01. SEQUENCES/ REPORTING STRUCTURE/ HOW TO ASSESS

- The best sequences to use.
- A pattern to assess the scan and ,
- A structure for reporting so that nothing is missed.

### 02. TARSAL COALITION

- What is it, they different types and what's the normal anatomy I need to know.
- Learn the X-ray, CT & MRI appearance of the common coalitions.

### 03. CHOPART JOINT

- What's the bone & ligament Anatomy I need to know.
- X-ray, CT and MRI appearance of Chopart joint abnormalities.
- What to look for, how to assess & how to report.

### 04. SINUS TARSI

- What's the bone & ligament Anatomy I need to know.
- X-ray, CT and MRI appearance of Sinus tarsi abnormalities.
- What to look for, how to assess & how to report.

### 05. LIS FRANC

- What's the Bone, Joint & Ligament Anatomy I need to know.
- Learn the X-ray, CT and MRI appearance of Lis franc joint trauma.
- What to look for, how to assess & how to report.

### 06. STRESS FRACTURES

- X-ray, CT and MRI appearance of the common stress fractures.
- What to look for, how to assess & how to report.

### 07. TIBIAL TUNNEL

- What is it, what's the anatomy I need to know.
- MRI appearance of tibial tunnel lesions.
- What to look for, how to assess & how to report.

### 08. BAXTER'S NEUROPATHY

- What is it, what's the nerve anatomy I need to know.
- MRI appearance of Baxter's neuropathy.
- What to look for, how to assess & how to report.

### 09. CHARCOTS ARTHROPATHY

- What is it, what's the anatomy I need to know.
- X-ray, CT and MRI appearance of charcots.
- What to look for, how to assess & how to report.

### 10. MORTON'S NEUROMA & INTERMETATARSAL BURSA

- What is it, what's the anatomy I need to know.
- MRI appearance of Morton's neuromas , intermetatarsal bursa & Bursal Neuroma Complex.
- Where to look, What to look for & How to find it.

### 11. PLANTAR PLATE

- What is it, what's the anatomy I need to know.
- MRI appearance of plantar plate abnormalities.
- What to look for, how to assess & how to report.
- How to differentiate from Morton's Neuromas.

### 12. METATARSO PHALYNGEAL JOINTS ( 2ND-5TH)

- What's the ligamentous anatomy I need to know.
- MRI appearance of tears of the MTPJ ligaments.
- What to look for, how to assess & how to report.

### 13. TURF TOE

- What is it, what's the anatomy I need to know.
- MRI appearance of turf toe abnormalities.
- What to look for, how to assess & how to report.
